

Semi-Active RFID Reader

Intellex multi-protocol RFID reader provides extended reading capability. This reader supports both UHF passive (EPC C1G2) and battery-assisted passive RFID tags (GEN3).

It provides several connections including TCP/IP, GPIO and RS232 connections.

Besides, this reader is equipped with the built-in web server which provides the reader status reporting, and remote reader configuration. It also provides web-based tag inventorying, tag memory reading/writing and tag commissioning.
